SYNTHETIC CLINICAL RECORD

Invented patient identity and values for software development and summarization evaluation

Synthetic OPD Follow-up Note

Patient ID	SYN-P005	**Record ID**	P005-D05
Patient name	Devika Menon	**Age / Sex**	68 years / Female
Document date	2026-10-24	**Record type**	Follow Up Note
Clinical focus	General medicine follow-up with medication discrepancy	**Facility**	Example Community Clinic (synthetic)

Current complaint

Dizziness on standing continues occasionally. No fall reported in the last month.

Current medicine use

Patient reports taking metformin 500 mg twice daily. Patient is unsure whether amlodipine was changed to 2.5 mg or remains 5 mg daily; an older list shows 5 mg.

Vitals recorded at visit

Seated BP 132/80 mmHg; standing BP not recorded; pulse 78 beats/min; temperature 36.5 °C; SpO■ 98%; weight 62.4 kg.

Historical context

HbA1c values: 7.4% (2025-10-05) and 7.9% (2026-04-09). Historical medicine list and current patient report differ on amlodipine dose.

Plan recorded

Clinician review requested for dizziness and medication dose discrepancy. No medication change is made in this note.

Safety notice: This is invented data for testing document extraction, provenance linking, longitudinal summarization and medication-reconciliation workflows. It must not be used to diagnose, prescribe, train clinical decision rules, or guide real patient care.
